

BUSINESS NORTH CAROLINA'S

# Top Doctors

North Carolina's most respected doctors in 65 specialties are presented in this annual report. Those cited were selected by their peers with a goal of saluting the state's leading medical practitioners.

**M**ethodology & disclaimer: This report was produced by **DataJoe Research**, a software & research company specializing in data collection & verification. The Lakewood, Colorado - based company conducts various nominations across the United States on behalf of publishers. To create the "Top Doctors" list, **DataJoe Research** facilitated an online peer - voting process, also referencing government sources.

**DataJoe** then tallied the votes per category for each doctor to isolate the top nominees in each category. After collecting nominations & additional information, **DataJoe** checked & confirmed that each published winner had a current, active license status with the state regulatory board. If we were not able to find evidence of a doctor's current, active registration with the state regulatory board, that doctor was excluded from the list.

In addition, any doctor who has been disciplined, up to the time frame of our review process for an infraction by the state regulatory board, was excluded from the list. Finally, **DataJoe** presented the tallied result to the magazine for its final review & adjustments.

We recognize that there are many good doctors who are not shown in this representation. This is only a sampling of the huge array of talented professionals within the region. Inclusion in the list is based on the opinions of responding doctors in the region & the results of our research campaign. We take time & energy to ensure fair voting, although we understand that the results of this survey nomination are not an objective metric.

We certainly do not discount the fact that many good & effective doctors may not appear on the list. **DataJoe** uses best practices & exercises great care in assembling content for this list. **DataJoe** does not warrant that the data contained within the list is complete or accurate. **DataJoe** does not assume, & hereby disclaims, any liability to any person for any loss or damage caused by errors or omissions herein, whether such errors or omissions result from negligence, accident or any other cause. All rights reserved. No commercial use of the information in this list may be made without written permission from **DataJoe**.
